

2007 Bicycles

Portland, Oregon – USA's #1 Cycling City

Just down the I-5 corridor from Raleigh America's corporate headquarters in metropolitan Seattle, lies another bastion of bicycling, the epicenter of northwest cycling: **Portland, Oregon**. Consistently ranked as the Best Overall Cycling City in the U.S. by Bicycling Magazine, Portland offers more opportunities to more types of riders than many European cycling destinations.

Resources available to Portland cyclists are both plentiful and comprehensive. The non-profit **Bicycle Transportation Alliance (BTA)** is headquartered in the Rose City, with its dual mission of "opening roads and minds to cycling" and "improving bicycling conditions throughout the state." Bike paths and bike lanes are abundant, and with the bicycle-friendly TriMet light rail and bus systems linked together, getting around downtown as a cyclist has never been easier.

Additional cycling resources include perhaps the most complete metro cycling websites found anywhere, **www.bikeportland.org**. Founder and editor Jonathan Maus has compiled an astonishing array of links, forums, stories, and other valuable information on his site. According to Maus, Portland is a unique city due to diverse interests working towards a common goal. "I like to think of it as an ecosystem where each part of the community plays a crucial role in keeping the entire system healthy and vibrant."

As you examine the following pages of our 2007 product catalog, you will see images of Portland's abundant cycling fare. Whether downtown or in the surrounding areas, there is something for everyone. We only noticed one problem during our catalog production: we had a heck of a time finding a coffee shop that opened before 7:00am. Evidently Portland's still got a bit of work to do to catch Seattle in that arena, but while you're there (or anywhere!)

- Enjoy the Ride!

ROAD

Featuring exciting new frame platforms and bold new graphics, these are definitely not your grandfather's Raleighs! From the all new **A.C.E. Evolution** full carbon models to the Intrigue women's specific bikes and beyond, a Raleigh road bike will take you where you need to go!

Raleigh Introduces the New 2007 A.C.E. Evolution Frame

The totally redesigned **2007 Raleigh A.C.E. Evolution** frame features our new, proprietary **Direct Connect Carbon Technology** combined with our race proven geometry. Direct Connect is an assembly process that eliminates the need for lugs, overlapping joints, or expensive fixed molds. By using precisely mitered tubes that are joined directly to each other, our design and engineering team is able to add material only where it is most needed, minimizing voids and creating a very light and exceptionally strong frame.

A.C.E.

Direct Connect Carbon Technology has several distinct advantages:

- **Light weight without sacrificing strength**
- the A.C.E. Evolution is a true sub-1 kilogram frame (57 centimeter, unpainted)
- **Increased stiffness in critical areas**
- function-specific shaped tubes, oversized bottom bracket, and material lay-up combine to maximize power transmission
- **Freedom to fine tune frame characteristics**
- each tube is "tuned" for the perfect balance of weight, stiffness & ride compliance

Direct Connect Carbon Technology is in part a technological evolution and in part a return to traditional hand craftsmanship:

Step 1 - Each tube starts with individual sheets of carbon fiber fabric, laid-up by a highly trained technician to a very specific plan, or schedule, around a shaping tool (sorry, we can't tell you more because it's classified - sshh!).

Step 2 - Technology takes over, as the material is compressed and heated through a proprietary process to precise levels of pressure and temperature.

Step 3 - After a carefully controlled cooling process, the tubes are painstakingly miter-cut to specific lengths for assembly into a frame.

Step 4 - The craftsman returns to the process, as tubes are bonded together while being held in place in a frame jig, ensuring exact alignment. The joints are then over-wrapped and reinforced with a series of narrow strips of high-tensile strength carbon fiber fabric.

Step 5 - Each joint is now compressed using Raleigh's proprietary methodology and tooling. Then the entire frame (still mounted in the frame jig to ensure exact alignment) is heated, causing the resin of the wrapping strips to bond with the resin of the tubes, creating a very strong joint.

*Combine these factors and the result is a lightweight and highly efficient frame, with Raleigh's race proven geometry and a ride quality that you have to experience to understand. The **2007 A.C.E. Evolution** is the best frame we have ever made - period. Test ride one today, and **Enjoy the Ride!***

Mount Hood Classic Stage Race: Gaining Momentum

Oregon's **Mount Hood Cycling Classic** stage race is fast becoming one of the premier events on USA Cycling's National Racing Calendar. In its fourth year, the 2006 edition of the MHCC was comprised of six diverse stages over the course of six days in early June. The Men's Pro Category 1-2 race featured 300 miles of racing and over 25,000 feet of climbing.

photo: Christopher Leck
Northwest Event Photography
www.nweventphotography.com

The MHCC is made all the more interesting due to the stunning beauty and the diverse topography of its course. The varied terrain highlights many of the natural elements that make Oregon a cyclist's paradise, including the lush green of the Hood River valley, the Columbia Gorge National Scenic Highway, and Mount Hood itself.

In 2006 the race attracted national powerhouse teams such as the Health Net and Navigators squads, with Nathan O'Neill of Health Net taking top honors. The increased attendance by top teams provides evidence that the MHCC has become a race with true national implications. On a positive note for local riders, **Recycled Cycles/Raleigh** rider Ian McIsick turned in the performance of his young career, posting a 4th place overall finish.

Raleigh's Women's Advisory Cycling Council Makes a Difference

There are very few sports where the enjoyment of the experience depends so much on the fit and functionality of a complicated machine. Not only does the machine, the bicycle, need to be designed well in the first place, but a rider needs to find the bicycle that best suits her individual body and riding style. Designing products and a selling environment that create a thoroughly enjoyable cycling experience for women is the mission of the **Women's Advisory Cycling Council (WACC)**.

photo: Earl Harper
www.harperstudios.com

We as women do not want to be treated differently; we want to be recognized on an equal basis as cyclists, athletes, and customers. Real progress comes from inclusion of women in the design and marketing process, and Raleigh America established the WACC with that goal in mind.

Our goals, however, are not limited to creating and selling products to women. We are also committed to outreach in the community to create and support more opportunities for women cyclists. To maintain the current growth of women coming into the sport of cycling - and to support women already involved - there is a need to create clubs, events, and training for women, and we are committed to doing our part to maintain those efforts. So come on along - it's going to be a great ride.

Cross Crusade: The Northwest Cyclocross Rivalry

The Pacific Northwest is one of the nation's hotbeds of cyclocross, that exquisite fall obsession that has been known to make grown men (and women) cry, run about in shorts in the freezing cold, and lay face down in the mud. Contested on short courses that are placed mostly on grassy (read: muddy), dirt road, or sandy conditions, cyclocross racers are forced to dismount along the course to navigate hurdle-like barriers and to run up short hills that are too steep to ride. Races take only 30-45 minutes, but as any 'cross racer will tell you, it's the most brutal 30 minutes imaginable.

photo: Jonathan Maus
www.bikeportland.org

Nowhere is cyclocross passion more apparent than in the towns of Portland and Seattle, where a rivalry runs deep and shots are fired up and down the I-5 corridor throughout the race season. Racers compete in the **Seattle Cyclocross Series**, while Portland answers with its own **Cross Crusade** series. National caliber racers who live in the area include Erik Tonkin, Dale and Ann Knapp, and Johnny Sundt, to name but a few so there is no shortage of local talent, and races are fast and furious.

Fueling the rivalry this year will be the fact that the nation's largest and most successful race series, the **Crank Brothers US Grand Prix of Cyclocross**, will stage its climactic weekend season finale on November 18-19 at venues in both greater Seattle and Portland. There is always a festival atmosphere at these races, with large crowds, clamoring cowbells, marching bands (performing on stilts!), hub deep mud, and lots of good old fashioned, dirty biking fun. These races likely determine the USGP series winner, so excitement levels will be high.

For more information please visit www.crosscrusade.com or www.seattlecyclocross.com

Performance Comfort Road

The popular Cadent lineup returns for 2007, bolstered by the edition of the Cadent Carbon A.C.E. Evolution model, a full carbon rocket that's as fast as it is comfortable. There are Cadent models to suit all riding styles and budgets.

CADENT CARBON

Road

Cadent Carbon A.C.E. Evolution:

Taking our Performance Comfort Road concept to a higher level, the **2007 Cadent Carbon** features a totally new full carbon frame that combines proven **Re²P Geometry** with our proprietary **Direct Connect Carbon** technology. The Cadent Carbon sets a new standard for comfort, and with an **A.C.E. Evolution** Cadent frame, you know it's going to be light and fast. We've added a lot of thoughtful features to this model as well, including a custom carbon fork, clearance for 28c tires with fenders, and front and rear fender mounts.

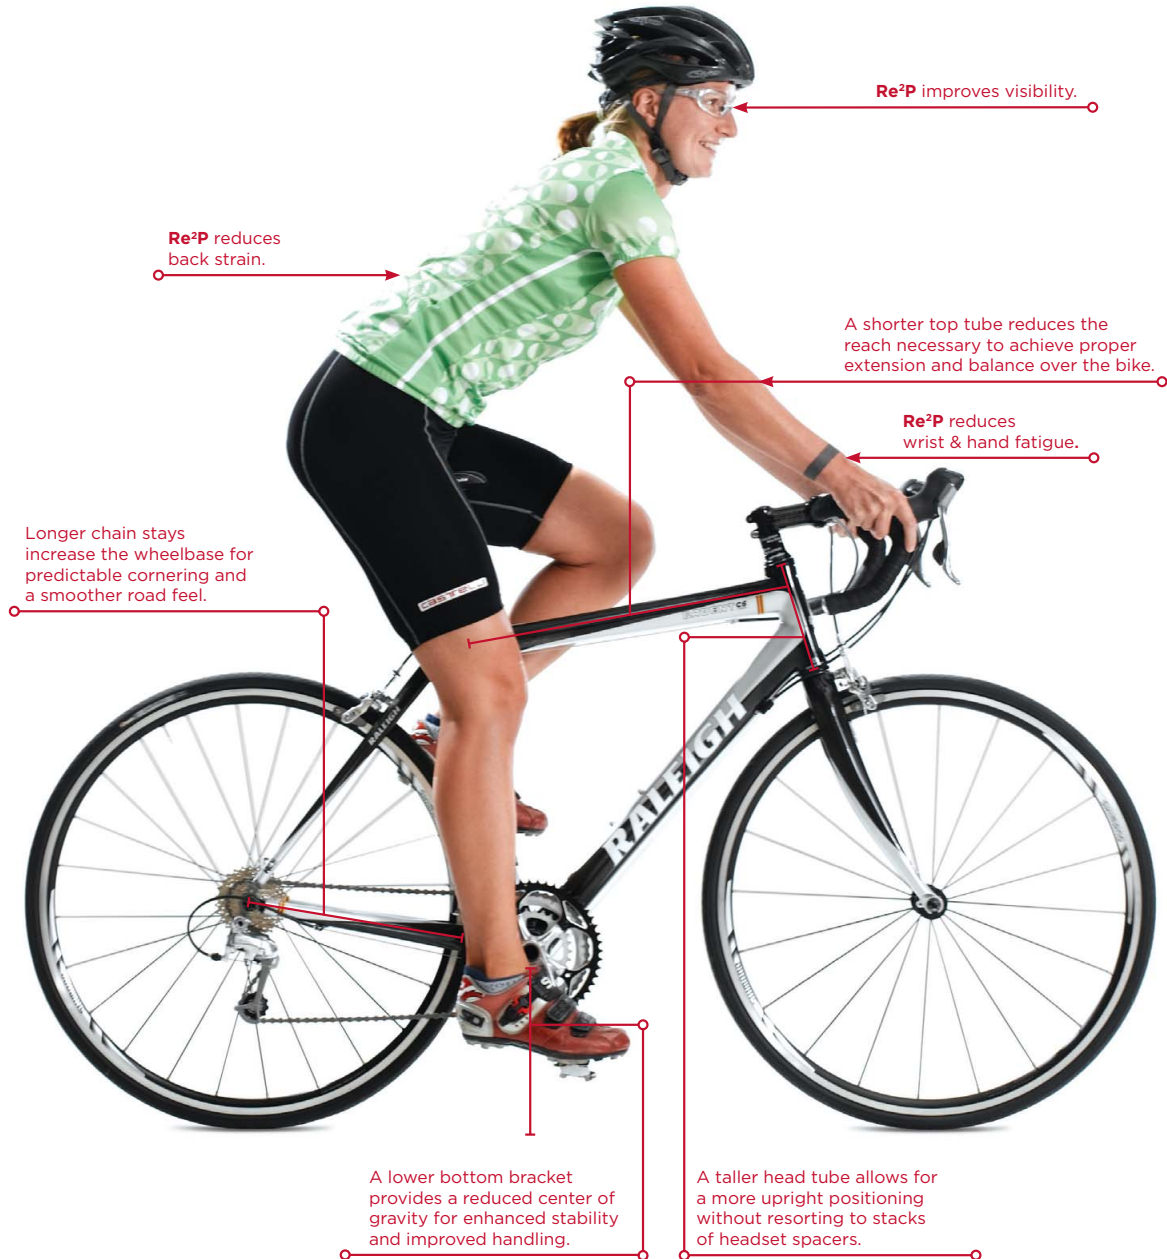

A.C.E.

Re²P, or Relaxed, Ergonomic, Efficient Positioning, is the foundation of our Cadent Line. Using this design philosophy, the Raleigh Product Team has developed a line of bicycles which reduce back and neck strain and pressure on the hands and wrists. The result: A "Heads Up" riding position, allowing Cadent riders to ride longer with more comfort than on traditional road bikes.

The Cadent is perfect for those looking to participate in fast fitness and event rides, light duty touring, commuting or just plain recreational riding fun. New cyclists are perfect candidates for the Cadent, as they will be able to reap the benefits of a lightweight high performance bicycle minus the intimidation that road racing bikes often present. Older riders, those returning to the sport or riders with health or flexibility issues will find relief and renewed enjoyment courtesy of **Re²P**.

Seattle to Portland: A Classic Signature Northwest Cycling Event

One of the largest and most famous organized cycling events in the country occurs every July in the Pacific Northwest. The **Group Health Seattle to Portland Bicycle Classic** – or STP, has been drawing cyclists from all over the world for 27 years running. The STP is the largest multi-day organized bike ride in the Northwest, drawing more than 9000 riders to cruise through the scenic valleys and rural farmlands of western Washington and Oregon.

photo: Jonathan Maus
www.bikeportland.org

Organized by Seattle's **Cascade Bicycle Club**, the largest organized bike club in the US, the STP originated as a race in 1979. The STP allows riders to choose one-day or two-day options to complete its 202 mile length, with the majority choosing the latter. Two-day riders typically overfill hotels, campgrounds, churches and fields near the ride's mid-point in Chehalis, adding a festival-like flair to the proceedings.

The ride is well organized and supported, with rest and community-organized food stops approximately every 25 miles en route. The Cascade Bicycle Club provides sag and mechanical support along the way, but don't be fooled into thinking that the STP can be completed on a lark. Any ride of this magnitude must be approached with the proper preparation of body and equipment, lest the rider find out the hard way what it means to come up a bit short.

For more information please visit: www.cascade.org

Track/Single Speed

The Rush Hour is back for 2007, and this time it brought some friends to the party: The Rush Hour Pro fills the bill for flat out velodrome racing, while the classic One Way is perfect for commuting, running errands, or just plain styling around.

Alpenrose Velodrome: A Classic Venue for Track Racing

In case you haven't noticed while turning the pages of this catalog, there has been resurgence in the interest in fixed gear and track style bikes of late. Concurrently, there has been renewed interest and participation in track, or velodrome racing. Portland has the good fortune of being the home of **Alpenrose Velodrome**, one of America's premier and most storied venues for track cycling.

Originally constructed as a dirt bike racing track in 1962 by the owners of the Alpenrose Dairy and renovated in 1997, the Alpenrose track has been the site of numerous regional, national and international competitions. Alpenrose Velodrome is one of the steepest and most exciting velodromes in the country. The track is 268 meters in length and the banking is an incredible 43 degrees, causing riders to experience loads of up to 2G's in the tight 16.6 meter radius turns!

The **Oregon Bicycle Racing Association (OBRA)** hosts a full array of events at Alpenrose - ranging from Masters, regional and national championships, to women's and kids races. Alpenrose currently holds the distinction of being the only track in the country hosting a 6-Day race, the FIAC Six Day National Championship, which harkens back to the heyday of track cycling in the US in the early 1900's when velodrome racing was more popular than baseball as a national pastime.

For more information please visit www.obra.org or www.alpenrose.com

Raleigh Cycling Clothing shown in this catalog is available at www.vergesport.com or by calling 845-562-2500

In December 2005, Raleigh America Inc. announced a three year contract to provide support to the newly formed **Spike Professional Cycling Team**. The ultimate goal of this program is to have an athlete return to Olympic glory on a Raleigh bicycle at the 2008 Games in Beijing.

Based in Colorado Springs, the Spike Pro Track team is the United States' first-ever UCI pro track racing team. Comprised of nine of America's top male and female track cyclists, the Spike Team is targeting the UCI National Track Series, USA Cycling National Track Championships, and selected World Cup Track events. Riders will train and compete on Raleigh road bikes and **Rush Hour Pro** track bikes.

Handlebar: Alloy Road
Grips: Raleigh Gel Tape
Stem: Alloy Ahead
Brakes: Tektro Oryx Canti
Brake Levers: Tektro Road
Tires: Vittoria Randonneur Cross w/Reflective Sidewall, 700x35c
Seat: Raleigh Road
Seatpost: Alloy Micro Adjust 27.2mm

MAX System Makes Life Easier for Portland Cyclists

One of the key elements that make up Portland's cycling and pedestrian friendly infrastructure is the **Metropolitan Area Express (MAX)**, a light rail system that is owned and operated by **TriMet**, Portland's transit authority. Since 1986, Portland residents have been using the MAX system to travel throughout the greater Portland area. TriMet bus systems also incorporate MAX stations into their routes, creating a truly integrated public transportation system.

photo: Jonathan Maus
www.bikeportland.org

The MAX system is currently comprised of roughly 45 miles of track, divided into three lines, with two more in the planning stages. The routes primarily occupy reserved lanes, shoulders, and medians on city streets, while there are dedicated right-of-ways for the railway outside the central city. On any given day close to 100,000 riders may travel on the MAX system, passing through 63 stations on its more than 100 rail cars.

Bikes are allowed on all MAX rail cars and buses for free and bike lockers are available from the Bicycle Transportation Alliance at many MAX stations. There is also a 330-block Fareless Square in the downtown district where all MAX, TriMet bus, and streetcar rides are free of charge.

For more information visit: www.trimet.org

Flat Bar Road

Raleigh Flat Bar Road bikes provide the speed you need without forcing you into a bent-over riding position. Improved this year with butted aluminum frames and Re²P “Heads Up” Geometry, these bikes are lighter, faster, and more comfortable than ever.

Seat: Raleigh Saddle
Seatpost: Alloy Micro Adjust 27.2 x 300mm

Oregon Coastal Bike Route - US Highway 101

One of the things that makes Oregon attractive as a cycling destination is the wide range of natural beauty that rewards riders who explore its inland and coastal byways. One of the most well established routes is the **Oregon Coast Bike Route**, which follows **US Highway 101** for almost 380 miles in the northwestern part of the state. Thousands of cyclists ride this classic route annually because it provides some of the most spectacular scenery in the country.

Cyclists are directed along the route by a series of posted signs, as areas where the route departs from the highway are called out and cyclists can take advantage of side routes that have lower traffic volumes and speeds. There are also "Cyclists on Roadway" signs in areas where the shoulder is somewhat narrow, alerting motorists to the possibility of riders in the area.

The generally mild nature of Oregon's weather makes this an attractive route in all seasons, although the best months to travel are between late August and October due to reduced traffic volumes. Cyclists should also be prepared for fog, rain, and cool temperatures at any time of the year. Total elevation gain along the route is almost 16,000 feet, so bring your climbing legs!

Providence Bridge Pedal Attracts Thousands Annually

Ten Bridges - No traffic jams! One of the signature cycling events in Portland is the **Providence Bridge Pedal**, an annual event that has attracted huge numbers of area riders for 10 years running. This unique ride allows cyclists to crisscross the Willamette River on no fewer than 10 bridges, including opportunities to ride on the top decks of the Fremont and Marquam bridges - freeways that are normally off limits to bicycles.

photo: Jonathan Maus
www.bikeportland.org

Billed as "the perfect Portland event" by the Oregonian newspaper, the PBP is the second largest recreational cycling event in the country. Last year over 18,000 cyclists participated in the event's 10th anniversary edition. With distance options of 14, 24, and 36 miles, the ride offers a choice for all types of riders. Start times are staggered to allow faster riders, women's specific groups and families riding with children a chance to ride in a group that suits their mood and tempo.

Perhaps the atmosphere is best summed up by Oregon's **Bicycle Transportation Alliance** on their website, "Riders go places normally off limits to bikes, reminding themselves and the rest of the city how sweet a world without cars can be - even if only for a day." We witnessed this event during the production of our catalog, and were amazed at the sheer numbers of riders, passing by in a seemingly endless parade.

Seatpost: Easton EA30 27.2mm

What kind of bike is that, anyway?

What is a twenty-nine inch bicycle? Plainly put, the currently popular bicycles being called "29'ers" are mountain bikes with 700c (road diameter) wheels. Tire and wheel size nomenclature can be frustratingly complex, so let's keep it simple - 29-inch wheels and 700c wheels are actually the same. You can interchange the tires and wheels, there is no difference at all - it's just a "name thing." So 29-inch equals 700c. It's that simple. Well, sort of.

So why put 29-inch wheels on a perfectly good mountain bike? For starters, it can be shown that a 29-inch wheel maintains more momentum once moving, is more stable and has increased traction due to its larger tire contact patch, rolls over objects easier, and travels farther for each pedal revolution. 26-inch advocates believe a conventional mountain bike accelerates and brakes faster, and is nimbler handling in tight situations.

Ultimately it comes down to riding style - 26-inch for riders who like tight, twisty trails with frequent accelerations and decelerations, and 29-inch wheels for riders who prefer flowing trails, fire roads, and occasional riding on pavement. So take a test ride and see what all the fuss is about, but be forewarned - riding a Raleigh XXIX or XXIX+G may cause rational adults to make spontaneous additions to their bike collection!

Forest Park Offers Portland Residents Recreational Opportunity

Like a wooded gem in an urban setting, **Forest Park** is one of the largest forested city parks in the U.S., covering more than 5,000 acres. Overlooking the Willamette River, the park contains nearly 70 miles of varied trails along its eight-mile length. This oasis provides sanctuary for a wide variety of user groups, from hikers to bird watchers, runners, cyclists, and outdoor enthusiasts.

photo: Earl Harper
www.harperstudios.com

Thanks in large part to the collaborative efforts of the **Portland United Mountain Pedalers (PUMP)** and the Friends of Forest Park, a grant was secured that makes possible the construction of the first new bicycle trail in Forest Park since 1989. This new trail will be built as an addition to an existing access road system, and will be constructed by volunteer trail builders and AmeriCorps volunteers.

The new trail will be maintained by PUMP and will be used to demonstrate that mountain biking can be a sustainable low-impact activity in such shared use areas. According to PUMP board member Roger Louton: "By doing this, showing we care about the park and helping out, we hope that the Parks Department will be open to adding more trails in the future."

City of Portland Encourages Trips by Bicycle

How many cities can you name where the government actually encourages folks to use their bicycles more often for trips within city limits? Not surprisingly, Portland has them beat in this department, as evidenced by the City of Portland's **Portland by Cycle** program. Through this program, the **Portland Office of Transportation** is seeking to promote bicycling as a viable means of transportation and a component of a healthy lifestyle.

photo: Jonathan Maus
www.bikeportland.org

The program has several components, including a resource kit that includes bicycle maps, ride and event schedules, a cycling coupon book and a Portland by Cycle guide. There are also various programs that target specific types of cyclists and offer resources and incentive to get them out and riding.

One of these programs is called **Summer Cycle**, and consists of a series of casual 8-10 mile organized rides around Portland's east-side. **Women on Bikes** is a program that seeks to increase female rider participation by providing clinics, rides, and resources geared specifically towards encouraging women cyclists. The city's **Smart Living** classes educate participants about the value of cycling as a component of a healthy, active, sustainable lifestyle.

Tour de Fat: The Other TDF

Portland's cycling community includes the full spectrum of bicycle user types. Buttoned-down white collar business types, working messengers, fitness seekers, racer dudes, and dude-ettes all co-exist in a reasonably peaceful fashion on the streets of the Rose City. One particular event however, caters specifically to the left-leaning (and sometimes wobbling) element of cycling society, and that is none other than **New Belgium Brewery's Tour de Fat!**

photo: Jonathan Maus
www.bikeportland.org

Billed as a "philanthropic cycling circus," the TDF is an annual event sponsored by New Belgium Brewery that takes place in forward-thinking cities across the country. Participants are encouraged to get their freak on, so to speak, by combining tall bike, chopper, and cruiser riding with copious amounts of costumed revelry. Perhaps a malt beverage or two will be consumed, and proceeds from beer sales go to the **Bicycle Transportation Alliance (BTA)** and **Portland United Mountain Pedalers (PUMP)**.

With a bike parade, bike limbo, and dance contests, a slow riding championship, and many other events, the TDF is a feast for the senses and a festival of biking free-spiritedness that has to be experienced to be believed. Check it out in a city near you!

Community Cycling Center Brings Cycling Education to Youth

One of the most impressive aspects of Portland's bike community is the way that varying groups band together for a cause and make a difference in the community through the love of cycling. One organization that brings seemingly disparate elements together is the **Community Cycling Center, or CCC**.

photo: Jonathan Maus
www.bikeportland.org

Established in 1994, the CCC offers a variety of programs and services, from free earn-a-bike programs for low income youth and adults to a full-service bike shop where "renewed" bikes, formerly occupying storage spaces, are sold. Proceeds from the bike shop benefit the popular earn-a-bike programs. In 2005, more than 500 local adults and kids earned free bikes through the Community Cycling Center.

The CCC has several key programs for youth, with the goal of providing at risk and low income children with an engaging, positive environment. One such program is **Get Linked**, which enables kids 5 to 12 years old in the neighborhoods surrounding the CCC's north Portland shop, to learn bike safety skills after school. Kids master 42 different skills, and in doing so earn refurbished bicycles, new helmets and locks.

The CCC has many other programs, camps, events and clinics designed to benefit both children and adults regardless of economic status. As CCC Development Director Alison Hill puts it, "the goal of our programs is to create a safe, accessible and sustainable bicycling community." To get inspired and to see how positive thinking, foresight, and dedication can make a difference in a community, visit www.communitycyclingcenter.org, or call **503-546-8864**.

Raleigh America is proud to be a member of Bikes Belong, a national coalition of bicycle suppliers and retailers working together to put more people on bicycles more often. Through national leadership, grassroots support, and promotion, we work to make bicycling safe.

We're working together to guarantee that future generations continue to enjoy the many benefits of cycling.

RALEIGH bicycles are distributed by Raleigh America, Inc. Raleigh America, Inc., Bicycle Limited Warranty

It is the owner's responsibility to thoroughly read and understand the owner's manual and regularly examine the product to determine the need for professional, authorized service or replacement. Please consult an authorized Raleigh America, Inc., bicycle dealership with any questions on use and maintenance. Regardless of the length of the warranty, Raleigh America, Inc., does not infer that the bicycle will last forever or cannot be broken. All Raleigh framesets and bicycles have a finite, limited useful product life cycle. The length of this useful life cycle will vary by environment, riding conditions, frame material and construction, riding style, maintenance, and the amount as well as type of use the bicycle or frame is subjected to. A worn out bicycle does not indicate it is warrantable, rather that the bicycle has outlived (exceeded) its useful product cycle.

Raleigh America, Inc., warrants this new Raleigh America, Inc., bicycle frame against defects in material and workmanship, subject to the following limitations, terms, and conditions:

Item	Warranty Term Length
Steel bicycle frames with wheel size less than 20"	Lifetime, for as long as the original retail purchaser owns the bicycle*
Steel bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Alloy bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Carbon Fiber or Carbon fiber/alloy bicycle frames with 20", 24", 26", or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Suspension bicycle frames	Five years from the date of original retail purchase to the original purchaser*
Forks, Non-branded	Five years from the date of original retail purchase
Forks, Branded	Covered under the fork manufacturer's warranty. Consult dealer for details.
Components, Non-branded	One year from the date of original retail purchase
Components, Branded	Covered under the component manufacturer's warranty. Consult dealer for details.
Finish and decals	One year from the date of original retail purchase
Suspension parts including but not limited to bushings, pivot bearings, link plates, bolts, fasteners, chain stays, seat stays, and shock units	One year from the date of original retail purchase under the condition that the bicycle is regularly maintained as well as operated under normal riding conditions
Labor, frame replacement	One year from the date of original retail purchase
Labor, parts replacement	Thirty days from the date of original retail purchase

1. This warranty only applies to the original retail purchaser and is not transferable.
2. Specific model exceptions to this warranty are noted with the bicycle documentation.
3. Raleigh America, Inc.'s sole obligation during the acceptable duration of this warranty is, AT RALEIGH AMERICA, INC.'S OPTION, to repair or replace the product with a current item that is equivalent in construction, design, or value.
4. Raleigh America, Inc.'s liability under this limited warranty shall never exceed the amount of the original purchase.

To obtain service under this warranty, you must:

1. Return your fully assembled Raleigh America, Inc., bicycle to an authorized Raleigh America, Inc., bicycle dealer within the United States of America. A bicycle that has had the components removed cannot be evaluated or warranted.
- *2. Provide proof of purchase, including but not limited to the retail bill of sale, your credit or debit card receipt, or other satisfactory proof of the date of purchase.
3. The proof of purchase must indicate the bicycle was sold fully assembled and adjusted by an authorized Raleigh America, Inc., dealer within the United States of America. Sales where the bicycle was delivered in a carton to the end user (e.g., mail order or Internet sales) void the warranty.

This warranty does not apply to damage or failure due to:

1. Accidents, alteration, abuse, neglect.
2. Materials fatigue, normal wear and tear.
3. Improper assembly, maintenance, or installation of parts or accessories not originally intended to be compatible with the bicycle as sold, including but not limited to power assist accessories, forks, brakes, or tires different from original specification.

This warranty also excludes:

1. Commercial use, racing or competition, stunting, jumping, trick riding, ramp riding, aggressive riding, riding with excessive loads, lack of technical skill, competence, or experience of the user.
2. Bicycle frames, which have been repaired (e.g. welded or bonded), repainted, or had the original decals removed.
3. Frames, forks, wheels, axles, handlebars, and stems, which are bent from just riding along, can be a sign of misuse or abuse and are not covered under this warranty.
4. Personal transportation costs or product freight costs to or from an authorized Raleigh America, Inc., bicycle dealer.
5. Any additional costs associated with the incompatibility of existing parts and the replacement frame or fork.

Warranty replacement frames must be fully assembled by an authorized dealer to maintain the warranty coverage.

The warranty for the replacement frame shall be the warranty offered for the equivalent bicycle's frame of that model year. If not assembled by the dealer, replacement frames are considered aftermarket frames. Aftermarket frames are only warranted for one year from the date of purchase for the original purchaser. This one-year warranty excludes any issues that can be traced to assembly or component incompatibility.

This warranty is expressly in lieu of all other warranties, and any implied warranties of merchantability or fitness for a particular purpose created hereby, are limited to the same duration as the express warranty herein. Raleigh America, Inc. shall not be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitations of implied warranties, incidental or consequential, so the above limitations and exclusions may not apply to you. Retailers and wholesale outlets for Raleigh America, Inc., products are not authorized to modify this warranty in any way. This warranty gives the original owner specific legal rights. Other additional rights may vary from state to state.

All Raleigh bicycles meet or exceed CPSC standards. Complete equipment is included with each Raleigh bicycle but not necessarily shown in photographs, e.g. reflectors. All Raleigh bicycles are covered under warranty. See your authorized Raleigh dealer for complete details. Raleigh specifications are subject to change without prior notice. Raleigh is a registered trademark of the Raleigh Cycle Limited.

WARNING: All riders depicted in this catalog are professionals. Do not attempt to duplicate any actions that are beyond your abilities. ALWAYS WEAR A HELMET!
